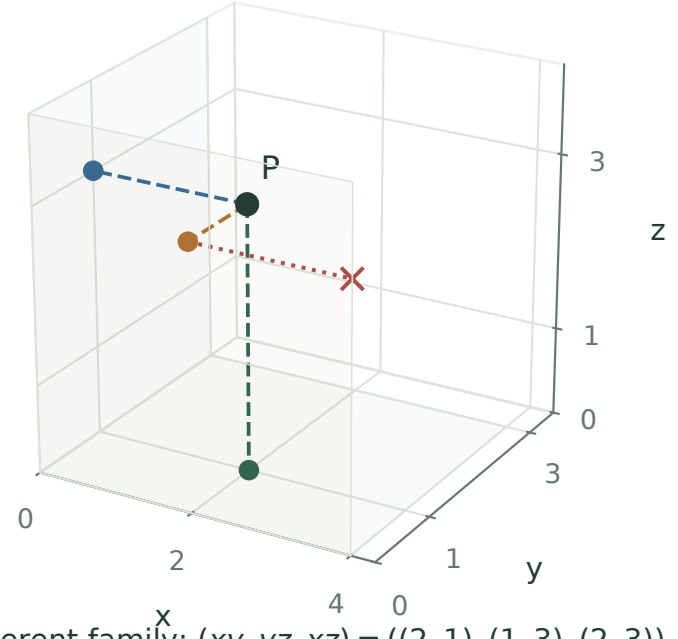
Which appearances belong to one point?

Shared coordinates are the overlap checks.



view	coherent	changed
xy	(2, 1)	(2, 1)
yz	(1, 3)	(1, 3)
xz	(2, 3)	(4, 3)

One changed x-value breaks the overlap.

Coherent family: $(xy, yz, xz) = ((2, 1), (1, 3), (2, 3))$.
