Degrees1…13
27,131 columns
143 invariant columns

Degree≥14
cost≥14·31
434>420

$$\eta = (31,87,57,101,84,60)/420$$

Every nonzero invariant column satisfies $\eta \cdot v \geq 1$.

$\eta \cdot 1 = 1 \Rightarrow$ total normalized matrix weight ≤ 1.
