Ordered derivative $D(X) = AX + XA$, $Q = B/4$

D

2	0	1	0
1	2	0	1
0	0	2	0
0	0	1	2

B

2	0	-1	0
-1	2	1	-1
0	0	2	0
0	0	-1	2

$$BD = DB = 4I$$

Passing: $B\delta = (0, 0, 32, 0)$
All coordinates
divisible by 32

Failing: $B\delta = (0, 16, 0, 0)$
Not divisible by 32
