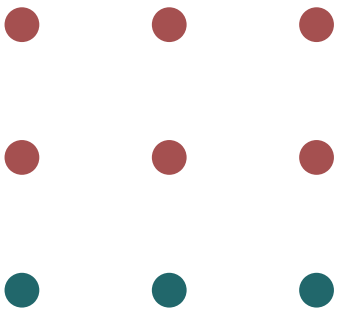
Compatibility does not replace the correction image

Model over F_3: $B = 0$



All 9 errors satisfy $Be = 0$
Only 3 lie in $\mathrm{im}\, J = \{(a, 0)\}$

Lift over $Z/4$
$A = [[1, 1], [0, 1]]$
$A^2 - I = 2E_{12}$

Corrected $A + 2\,\mathrm{diag}(1, 0)$
$[[3, 1], [0, 1]]$
Its square is I modulo 4
