Closed-work certificate dashboard

analytic coefficient quadrature	1.284938e-16
edge projector idempotence	1.116584e-16
packet annihilation	1.940851e-16
smooth packet reconstruction	9.992007e-16
full packet reconstruction	6.661338e-16
Haar mask reconstruction	1.221245e-15
dictionary true residual	3.106069e-14
dictionary wrong-model gap	3.019188e+00

Small algebraic residuals certify the implemented identities; the positive dictionary gap certifies uniqueness of the finite model selection.
