ONE ARCHIVE, DIFFERENT QUESTIONS

$$\mathcal{P} = (V, \mathcal{J}, A, T, \tau, \mathcal{E}, \mathbf{v}, \mathbf{c})$$

declared field

CERTIFICATE

Does the target follow?

$$A \vdash B$$

Certified nodes and rules.

LOCAL MODELS

Can the views agree?

$$\Gamma(\mathcal{M}_F)$$

Rules on complete supports.

TASK REPRESENTATION

What can be recovered?

$$q = d_q \circ C$$

One decoder across archives.

These are different mathematical tasks, not interchangeable certificates.
