One field: $\{a, b\} \to c$, no admitted leaves.

FEASIBLE

$S = \{a\}, \quad N = \{c\}$

$\mathrm{cl}_F(S) = \{a\}$

No forbidden node is derived.

OBSTRUCTED

$S = \{a, b\}, \quad N = \{c\}$

$\mathrm{cl}_F(S) = \{a, b, c\}$

$r_0 : \{a, b\} \Rightarrow c \in N$

The negative witness is a scoped derivation of c, not a failed search.
