What has been proved and what remains open

proved in this paper

- ✓ Stieltjes germ formulas
- ✓ $L^{(m)}(1,\chi)$ transforms
- ✓ detail variance
- ✓ primitive resultants
- ✓ complete monotonicity
- ✓ Hankel positivity
- ✓ zero-free resolvent
- ✓ Gamma scaling
- ✓ character decoherence

open

- principal Mobius coherence
- uniform GRH coherence
- packet canonical systems
- global zero-location theorem

The positive and cross-character layers are now controlled. The principal signed sector still carries the RH-scale obstruction.
