Analytic scaling illustrations only; no numerical truncation of the infinite divisor product.
2A |z|⁴ / T with A = |z| = 1
illustrative log-tail bound
10^0
10^{-1}
10^1
10^2
cutoff radius T
Cubic counting × local remainder
illustrative upper profile
10^0
10^{-1}
10^{-2}
10^{-3}
1
3
5
7
9
dyadic shell index j
genus 2: constant shell profile
genus 3: summable shell profile
