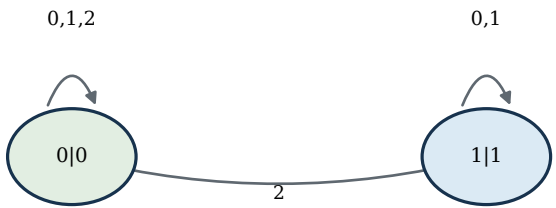
Exact nonperiodic rational-mask examples in characteristic three

Cantor-digit indicator

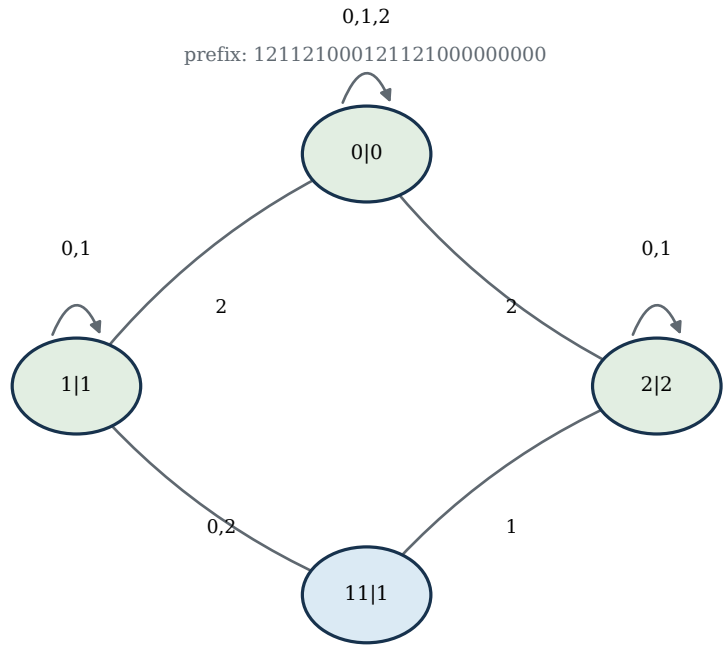
prefix: 110110000110110000000000



$R = 1 + z$, $F^2 = (1 + z)^{-1}$
Cartier rank 1; kernel states 2; compiler bound 9

Square-root denominator

prefix: 121121000121121000000000



$R = (1 + z)^{-1}$, $F^2 = 1 + z$
Cartier rank 2; kernel states 4; compiler bound 9
